

# BLUE PAD (LLT)

TDS N° 29.2

TECHNICAL DATA SHEET

2005

## Description

Self-adhesive flock on a PVC base used as polishing pad for all prescription lens materials (CR39, mid & high index, polycarbonate).

## Benefits

- Very high surface quality.
- Resistant flock. Avoid fibers in slurry.
- LLT adhesive provides a good adhesion with a capacity of quick removal.
- Resists to high polishing pressure.

## Technical Data

Colour	Blue
Flock	Synthetic material
Adhesive	Double bond acrylic/synthetic rubber
Thickness	0.80mm
Liner	High quality siliconised paper
Carrier	PVC
Life time	12 months

## Storage and Use

- 20°C ±5°C (68°F ± 9°F), products in their original packaging.
- The application surface has to be clean, dry, and free of grease and oil.
- CURT Fining pads are recommended to reach the best surface quality.

## Packaging

Boxes of 3500 pads (7 rolls of 500 pads).  
Rolls of 1000 pads.  
Available in different diameters.
