

Chromium granule 2-4 mm

TDS N° 110.1

TECHNICAL DATA SHEET

2007

Description

Chromium metal in granulated form 2-4 mm used in A/R coating stack to be evaporated under vacuum.

Benefits

- high purity material
- controlled shape and size
- consistent quality

Technical Data

Chemical formula	Cr
Shape	granule 2-4mm
Evaporation source	E.B. gun or Mo boat
Purity	99.85%
Melting point	1910°C
Density	7.19
Molecular weight	52

Storage and Use

- Keep in a sealed container
- Avoid contact with humidity
- Can be used in any vacuum chamber

Packaging

500 grs plastic bottle
